EXPERIENCE

Lead Software Engineer

Apr. 2021 – Present

Snowball.money • Remote / San Francisco, CA

- Contributed to both Frontend and Backend, playing a role in existing projects and building new web3 applications (dApps) from the ground up.
- Designed and implemented crucial backend microservices, ensuring blockchain transactions' seamless uploading and comprehensive state tracking.
- Created an SDK library with essential logic and interface components for use across various company applications.
- Supported and mentored developers through pair programming and code review, collaborating with management to streamline project planning.
- Architected project structure enforcing high standards of code quality using Vue 3, Vue Composition API, Nuxt, Vite, Web3, Fastify, Express.js, Google Cloud Platform, and other modern web development technologies.

Senior Frontend Engineer

Apr. 2020 – Mar. 2021

Sl-Tech • Remote / Moscow, Russia

- Participated in the development of an insurance broker platform that aggregates insurance offers from different companies on one page.
- Developed internal tools, including a web tool for PDF document template preparation focusing on SPA, UI components, and code maintenance.
- Migrated several web applications to Vue 3 + Composition API.
- Guided junior developers through consistent code reviews and hands-on support.
- Contributed to open-source projects and component libraries for Vue 3.

Senior Frontend Engineer

Aug. 2019 – Mar. 2020

Union Media Group • Moscow, Russia

- Developed SPAs (Single-Page Web Applications), UI components and maintained existing code base. Integrated with APIs in close collaboration with backend developers.
- Built an advanced VPAID-compatible AdUnit, integrating and wrapping two separate ad platforms.
- Implemented testing environments for video ad campaigns, CRMs, and customer-facing web applications using Typescript, Vue.js, Nuxt, Vuex

Frontend Developer

July 2018 – Aug. 2019

VMedia Inc. • Remote / Toronto, ON

- Developed SPAs, UI components and maintained existing code base. Integrated with APIs in communication with the backend team.
- Refactored the build system, significantly reducing build time.
- Utilized AngularJS, Twitter Bootstrap framework, PostCSS, and Gulp.

Web Developer

Sep. 2018 – Jan. 2019

IT-Arkhangelsk • Arkhangelsk, Russia

- Developed a complex web application for festival and contest attendees' registration using Typescript, Vue.js, Vuex, and Webpack.
- Contributed to backend development using Ruby on Rails.

Frontend Engineer

June 2014 – Jan. 2016

F5-Studio • Arkhangelsk, Russia

- Developed mobile-first responsive websites for the studio clients.
- Received designs in Adobe Photoshop and prepared pixel-perfect HTML/CSS markup. Implemented UI logic using either jQuery or pure JavaScript.
- Created WordPress templates from scratch.

EDUCATION

Northern (Arctic) Federal University

Sep. 2015 – Jul 2019

Bachelor of Applied Mathematics and Informatics
